THE

EUREKA

CONCEPT

EUREKA

Service Cycle

Reps

Our enthusiastic and dedicated sales team will give you their best and professional service. We invest in regular training for our people in order to add real value to your business.

Placing Orders

We assist in placing the order with our Sales Support System while physically taking stock. We keep 24 months sales history to make sure we spot trends and order according to sales rates. We keep your shelves neat and tidy.

Stock Management Support

We help you get the perfect stock balance without over stocking or understocking your shelves. We are experts on maximising profit per square meter and we constantly measure all key performance areas.

The Brand

Eureka has built a formidable brand image and we have a strong presence in Southern Africa. We advertise on TV, radio and niche magazines. Consumers insist on Eureka and they trust the brand.

Merchandising

Merchandising is done by our drivers who deliver your stock and also double up as merchandisers. Stock is sent on mini-stands making check-in fast and merchandising a breeze. We save you HOURS of labour so that you can focus on selling.

Happy Consumers
and awesome
Return On Investment
for you ... our customer!

Warehousing & Logistics

We proudly run a four year average of 97% fill rate on all orders placed. You get what you order. No back orders. We have 20 years of experience and knowledge of stock and sales forecasting, stock integrity and day stock cover. We warehouse six months' stock.

Deliveries

We have our own fleet of trucks and deliver nationwide. We have all the latest route & vehicle scheduling tools in place ensuring you get your stock in time and in perfect condition. Our drivers are well trained and equipped and make the check-in fast and hassle free.

Information Systems

Our in-house IT team designed a seamless integrated system. We host all our servers in our data center using modern Microsoft operating systems and virtualization technologies. From the moment your order is approved it follows a streamlined workflow that includes barcode-based picking and statistical inspection methods. We have EDI relationships with key groups. We have electronic invoicing and statement services.
